Summary

Full Stack Developer with experience building 10+ web applications, including real-time systems and secure RBAC architectures. Focused on backend design, scalability, performance optimization, and Machine Learning integration.

Experience

SDE Intern

Tienext

Remote | Kolkata

June 2025 – Aug 2025

- Built a centralized RBAC system using **Next.js**, **Tailwind CSS**, and **TypeScript** for scalable role-based access.
- Incorporated it across 3+ modules, reducing code duplication by **30%** and standardizing access control.
- Developed middleware for route protection using **JWT** and **Zod** to ensure secure, scalable access.

SDE Intern

Wynoot Labs

Remote | Netherlands

Mar 2026 – Present

- Contributed to building a scalable **no-code platform** for dynamic website creation and deployment with modular features like LMS, scheduling, and review systems.
- Worked on template management & deployment using **AWS S3**, improving template load and rendering reliability.
- Designed admin dashboard interfaces to **enhance usability** and streamline content and user management workflows.

Projects

VIDEOMEET – Real-Time Video Conferencing App 🔗

GitHub

- Built a low-latency (200 ms) real-time multi-user video communication platform using **React**, **WebRTC** and **Socket.io**
- Containerized services with Docker and automated **CI/CD** using **GitHub Actions**, pushing images to **AWS ECR**.
- Deployed on AWS EKS using **Kubernetes with LoadBalancer** exposure and internal service communication.

FINANCY – Smart Trading & Investment Platform 🔗

GitHub

- Built a full-stack investment platform enabling users to analyze, **buy, and track stocks** with an interactive, responsive UI for real-time insights and performance.
- Implemented **secure authentication**, portfolio management, and dynamic data visualization using Chart.js

COMMIT CONTROL – Custom Version Control System 🔗

GitHub

- Built a version control system supporting **repository management**, **commit tracking**, and branching operations.
- Developed CLI commands using Yargs for **init**, **commit**, and **history**, with commit visualization and file tracking for improved workflow clarity.

Skills

Languages:	JavaScript, TypeScript, Java, Python, C
Frontend:	React, Next.js, HTML, CSS, Bootstrap
Backend & Databases:	Node.js, Express.js, MongoDB, PostgreSQL
Tools & DevOps:	Git, Docker, CI/CD (GitHub Actions), AWS (ECR, EKS, S3), Kubernetes

Education

RCC Institute of Information Technology

B.Tech in Computer Science and Engineering

Aug 2023 – Jul 2027

GPA: 7.96/10

Achievements & Leadership

- **Cloud & DevOps Lead at RCCCTECHZ** – Led infrastructure and deployment initiatives for technical events.
- **Solved 300+ problems on LeetCode**

Certifications

- **Introduction to Cyber Security - Cisco** (May 2024)
- **Networking Basics – Cisco** (Mar 2025)
